PEOPLE'S REPUBLIC OF BANGLADESH**

**COMPREHENSIVE DISASTER MANAGEMENT PROGRAMME (CDMP)
PROJECT NUMBER BGD/01/004**

**NATIONAL EXECUTING AGENCY:
MINISTRY OF FOOD AND DISASTER MANAGEMENT (MoFDM)**

**DEVELOPMENT PARTNERS:
UNITED NATIONS DEVELOPMENT PROGRAMME (UNDP)
DEPARTMENT FOR INTERNATIONAL DEVELOPMENT (DFID)**

The Comprehensive Disaster Management Programme

The Comprehensive Disaster Management Programme (CDMP) was approved by the Bangladesh Government in 2003 as a key strategy to advance whole-of-government and agency risk reduction efforts in the country.

CDMP is a strategic institutional and programming approach that is designed to optimise the reduction of long-term risk and to strengthen the operational capacities for responding to emergencies and disaster situations including actions to improve recovery from these events.

Key benefits associated with this approach are that:

- The resources and expertise of government, NGO, private sector and the community are deployed according to national priorities and community risk reduction programming needs.
- It provides a big picture of what needs to be done and as such, a mechanism for identifying gaps, monitoring and observing achievement.
- It provides the basis upon which formal collaborating partnerships are developed and nurtured.

Government Vision on Disaster Management

"To reduce the vulnerability of the poor to the effects of natural, environmental and human induced hazards to a manageable and acceptable humanitarian level"

MoFDM Mission

The Ministry of Food and Disaster Management (MoFDM) has been given the mandate to drive national risk reduction reform programmes. Its mission relative to this agenda is:

"To achieve a paradigm shift in disaster management from conventional response and relief to a more comprehensive risk reduction culture"

Drivers for Change

CDMP strategies have been designed to achieve objectives associated with a number of key global and national drivers.

| Global Drivers | National Drivers |
|---|---|
| Millennium Development Goals (MDGs) | Poverty Reduction Strategy Paper (PRSP) |
| International Strategy for Disaster Reduction (ISDR) - Yokohama Strategy - National Platforms | Standing Orders on Disaster Management (SODM) |
| World Summit for Sustainable Development (WSSD) | Government of Bangladesh and United Nations Common Country Assessment (CCA) |
| World Conference on Disaster Reduction (WCDR) | United Nations Development Assistance Framework (UNDAF) |

PROGRAMME EXECUTION:

The Comprehensive Disaster Management Programme (CDMP) is managed under National Execution (NEX) modality. The Secretary, MoFDM is the National Programme Director (NPD). Three government agencies namely Disaster Management Bureau (DMB), Directorate of Relief and Rehabilitation (DRR) under MoFDM and Department of Environment (DoE) under the Ministry of Environment & Forest (MoEF) as well as the United Nations Office of the Project Services (UNOPS) are presently working as Sub- implementing Agencies (SIAs). The Food and Agriculture Organisation (FAO) is functioning as an implementing partner of DOE.

National Disaster Management Focal Point

A Policy, Programme and Partnership Development Unit (PPPDU) has been established to operationalise the CDMP process and to serve as a national focal point for the coordination of disaster management activities. This unit is an integral component of the MoFDM and undertakes the critical day-to-day CDMP management functions, establishes and nurtures partnerships, maintains liaison, advocacy and reporting responsibilities within government and with NGOs and Regional Stakeholders. The PPPDU is staffed by a team of full-time professionals:

- Chief Technical Adviser and Team Leader
- National Programme Management Expert and Deputy Team Leader
- National Expert (Coordination)
- National Expert (Training & Preparedness)
- National Expert (Monitoring & Evaluation)
- Training and Awareness Raising Specialist
- National Advocacy Expert
- Community Risk Reduction Specialist
- Training and Monitoring Expert

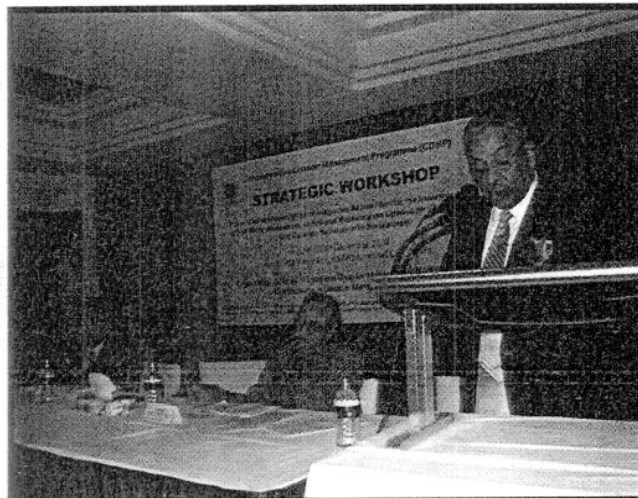

- Community Risk Reduction Expert
- Programme Component Implementation Specialist
- Technical Adviser (Climate Change)
- Information Communication Technology Specialist

CDMP seeks to reduce the level of community vulnerability and enhance sustainable development initiatives through a range of integrated strategies containing five strategic focus areas and ten components. Implementation Agencies are drawn from government and non-government sources with overall coordination provided by the PPPDU.

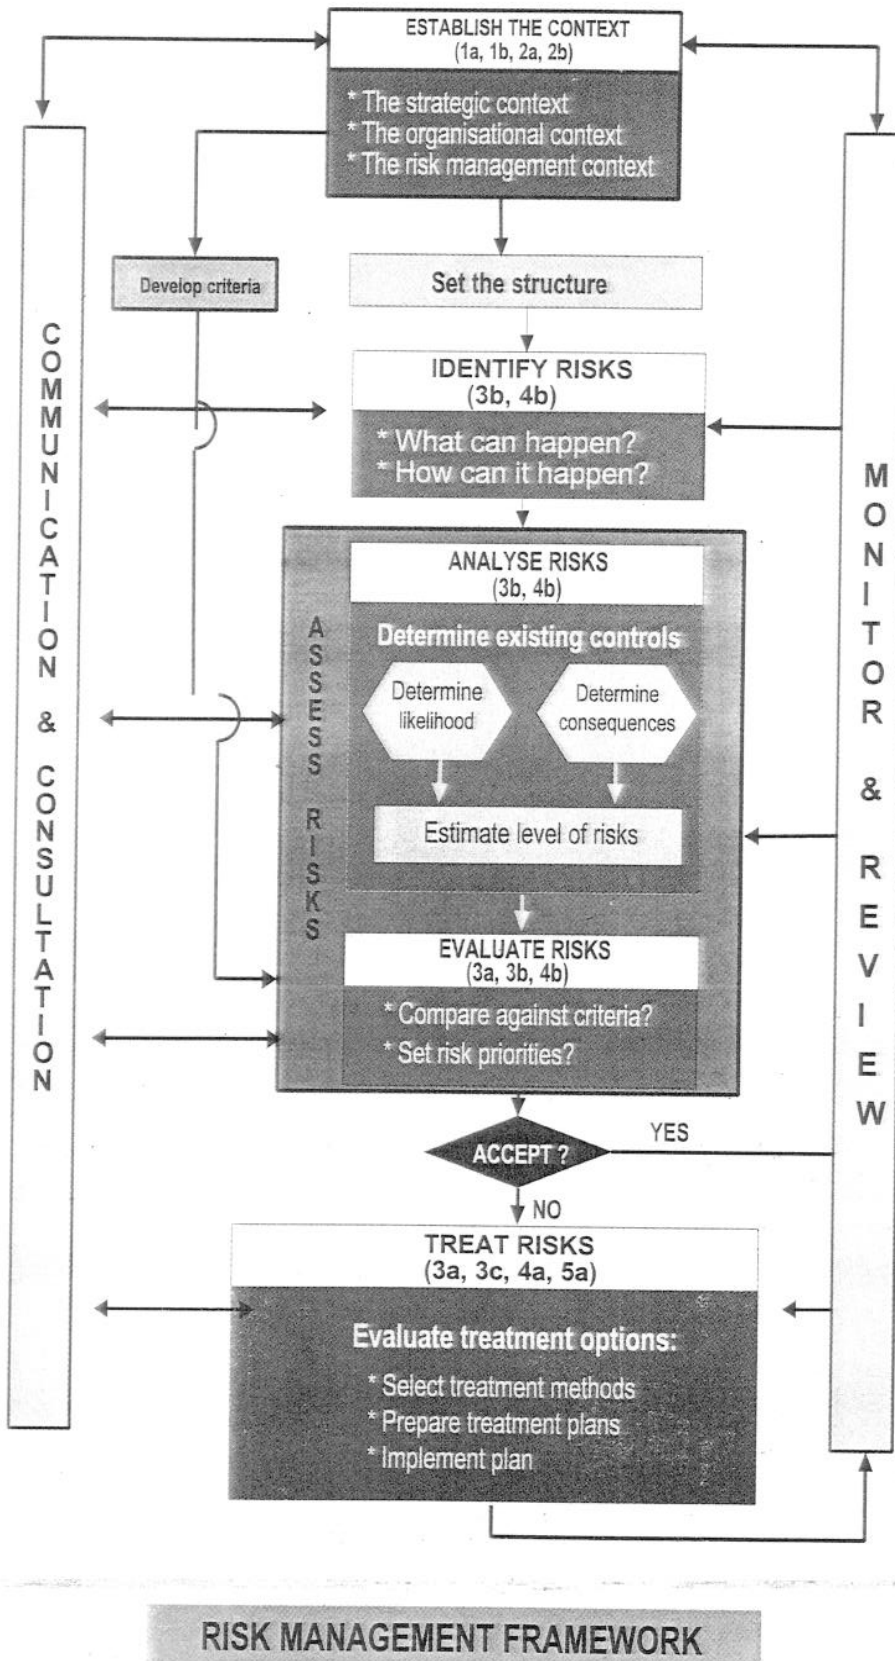

Programme Structure

Strategies focus on ensuring a comprehensive and well coordinated approach to community risk reduction. CDMP utilizes the International Risk Management Standard AS/NZS 4360:1999 as the basis for effective risk assessment with risk treatments designed around prevention, preparedness, response and recovery strategies.

| Strategic Focus | Corresponding Component (s) |
|---|---|
| Professionalising the Disaster Management System | 1. 1a - PPPDU 2. 1b – Professional Development |
| Partnership Development | 3. 2a – Advocacy and Awareness 4. 2b – Capacity Building |
| Community Empowerment | 5. 3a – Programme Gap Analysis 6. 3b – Risk Reduction Planning 7. 3c - Local Disaster Risk Reduction Fund |
| Expanding Mitigation, Preparedness and Response Across a Broader Range of Hazards | 8. 4a – Urban Search and Rescue 9. 4b – Climate Change and Research |
| Strengthening Emergency Response Systems | 10. 5a – Disaster Management Information Centre and Emergency Procedures |

BENEFICIARIES

CDMP is a whole-of-country strategy. Communities within high risk areas are the immediate beneficiaries of programme interventions. The direct beneficiaries of the programme are:

- Communities and community based organizations through improved capacities, both at national and local level, to design and implement disaster management programmes that are based on formal and traditional community risk assessment.

- Key national, district, Upazila and Union officials (including NGOs) who have disaster management programming and operational response coordination responsibilities;
- Key government decision-makers, politicians and elected local Government officials through advocacy and awareness programmes.
- National planning officers and all line government departments or agencies involved in development planning activities, through the promotion and incorporation of risk management measures within the development project validation process by way of Disaster Impact and Risk Assessment (DIRA) like the Environmental Impact Assessment (EIA) which has been incorporated in all development project analysis.
- NGOs, through their formal involvement in the CDMP process
- Private sector through increased interface and involvement in disaster management programme design and implementation.
