Climate Change Adaptation and Livelihoods Research and Study Inventory

Call for Submission of research updates on climate change adaptation and livelihoods

Bangladesh is recognized as one of the countries most vulnerable to climate change. A key challenge is to understand the risks and impacts and take measures for response.

Adaptation to climate change is a major area in which capacity and knowledge management play vital role. There are systematic research and study processes ongoing in the country addressing adaptation to climate change.

CDMP has taken an initiative to update the inventory of research related activities on climate change adaptation and livelihoods in Bangladesh. The updated inventory will be made accessible to the public as a part of serving their needs.

We are inviting you to respond to this call with your completed and, ongoing research topics covering **citation, abstract/summary, result/findings, recommendation/call for future research.**

19.10.2010

Comprehensive Disaster Management Programme (CDMP) Phase II
Disaster Management and Relief Bhaban (6th Floor)
92-93, Mohakhali C/A, Dhaka – 1212

Research/study Inventory format

1. Citation

- Title
- Author
- Publisher
- Date/year

2. Abstract/summary

3. Findings/results

4. Recommendation/call for future research
